

Bugg 1

Defect ID:

123

Title/summary:

While I installed the program named ListBoxer with help of the setup program I'd had certain errors.

Reporter Name:

Josefin Schönqvist

Defect Reported Date:

08/09 2020

Who Detected:

QA

How detected:

While doing a test.

Project name:

Technical Task

Release/build version:

I detected the problem while installing the software.

Defect/Enhancement:

pic 4. asked me if I wanted to install the software from an unknown publisher, could we verify the program so the user will be sure that the program is safe.

Pic 1. Ask me to click on a box that I don't recognize as a move forward box. The solution is to redesign the hierarchy, make a checkbox, and have a move forward button and an exit.

Pic 2. are asking in which directory I want to go, I think that's a question for later on while you are inside the program.

Pic 3. are asking me if I want to continue and yes I want. Had to click 3 times before I'd moved forward - change to 1 time.

Environment:

Windows 10

Priority:

High

Severity:

Critical

Status:

New

Step to Reproduce:

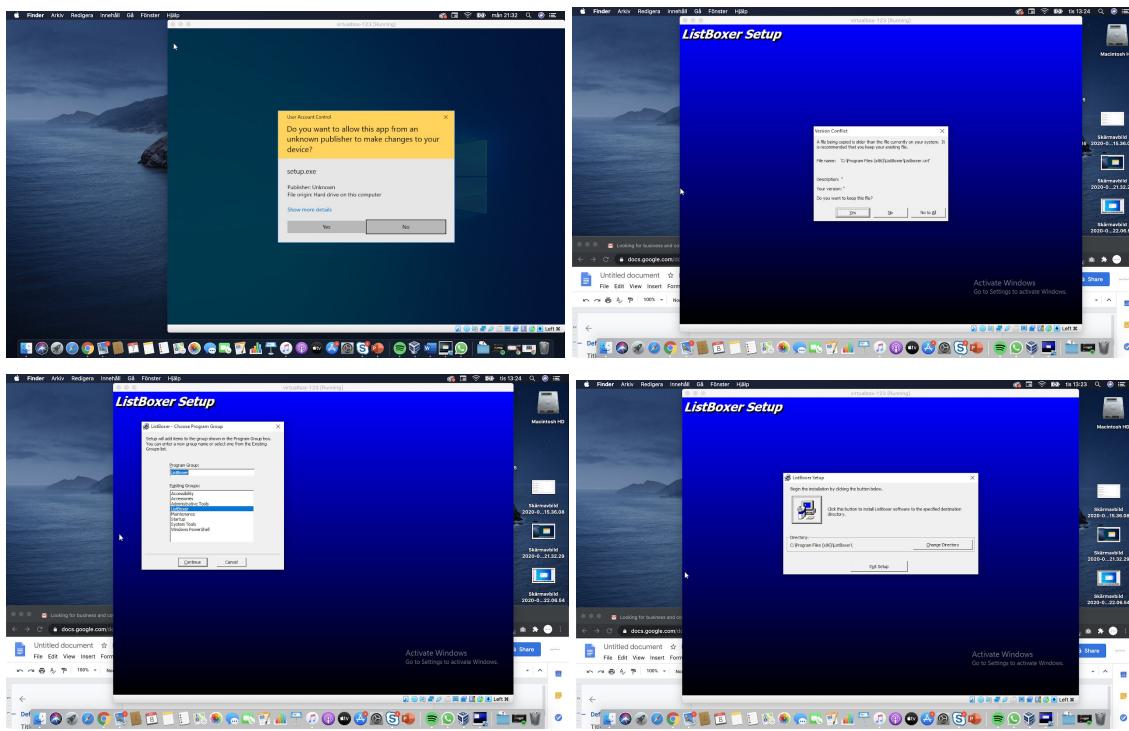

- i. Delete the old program
- ii. Re-download it
- iii. Start to install the program with the setup program

Expected result:

To install the application without error and from a trusted source.

Actual result:

Error, a feeling that the program is broken and no guarantee that the program doesn't have a virus inside.

Attachments:**Defect close date:**

1-3 days.

Bugg 2

Defect ID:

123

Title/summary:

After installation it is impossible to open “ListBoxer” from the desktop view, you need to go to your library or search.

Reporter Name:

Josefin Schönqvist

Defect Reported Date:

08/09 2020

Who Detected:

QA

How detected:

Running a test.

Project name:

Technical task

Release/build version:

While trying to open the program in my desktop view.

Defect/Enhancement:

- Pic 5. Shows what happens while you are opening the “ListBoxer” on the desktop.
- Pic 6. Shows that you can open “ListBoxer” while you are doing it from the library.
- Pic 7. Shows that you can open “ListBoxer” while you are doing it from the search bar.

Environment:

Windows 10

Priority:

High

Severity:

Critical

Status:

New

Step to Reproduce:

- i. After installation moves the “ListBoxer” app to your desktop window.
- ii. Try to open it.
- iii. Open the program from the library and search bar.

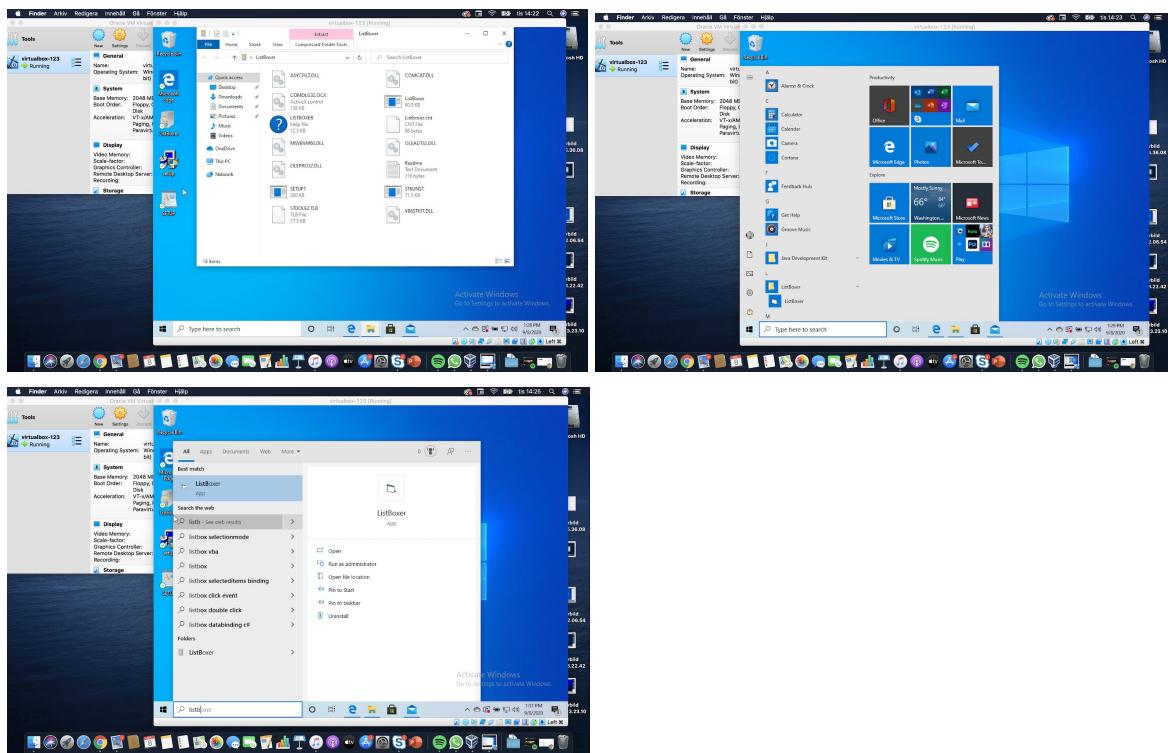

Expected result:

To be able to open the “ListBoxer” from everywhere.

Actual result:

Only able to open it from the library and search bar.

Bugg 3

Defect ID:

123

Title/summary:

I pressed the help button I got directed to a Windows page where they told me that they do not support Windows 10.

Reporter Name:

Josefin Schönqvist

Defect Reported Date:

08/09 2020

Who Detected:

QA

How detected:

Running a test.

Project name:

Technical task

URL:

<https://support.microsoft.com/en-us/help/917607/feature-not-included-help-not-supported-error-opening-help-windows>

Release/build version:

When I'd pressed the help button to search for help I got transferred to a help page.

Defect/Enhancement:

1. The first problem was that I couldn't access the help I needed with the current software.
2. The second was that I could download an extension software to solve my issue, but it was accessible up to windows 8.1.

See attached picture 8 and 9 for references.

Environment:

Windows 10 and Microsoft Edge Ink.

Priority:

Low

Severity:

Minor

Status:

New

Step to Reproduce:

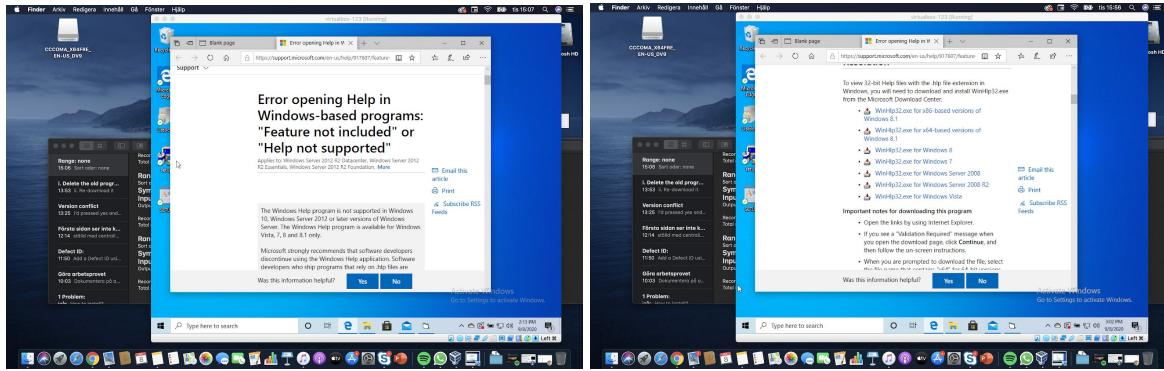

Microsoft strongly recommends that software developers discontinue using the Windows Help application. Software developers who ship programs that rely on .hlp files are encouraged to transition their Help experience to an alternative Help file format, such as CHM, HTML, or XML.

Expected result:

To go to a landing page/inside the program where I can search for help, who is specifically attached for “ListBoxer”.

Actual result:

Came to a landing page hosted by Microsoft who told me that they couldn't help me.

Attachments:**Defect close date:**

1-4 weeks.

Bugg 4

Defect ID:

123

Title/summary:

Wrong spelling at the edit button, spelled as “edjt”.

Reporter Name:

Josefin Schönqvist

Defect Reported Date:

08/09 2020

Who Detected:

QA

How detected:

Running a test.

Project name:

Technical task.

URL:**Release/build version:**

At the top bar did I find out that the “edit” dropdown menu was named “Edjt”.

Defect/Enhancement:

- i. Edjt
- ii. Clicking on undo, the only available option. Got the message: "Run-time error '380': Invalid property value" in a popup.
- iii. Pressed the ok button - Program trial ended.

See reference pictures 10 and 11.

Environment:

Windows 10

Priority:

High

Severity:

Blocker

Status:

New

Step to Reproduce:

1. Change the name from “Edjt” to “Edit”.
2. Ask why I could press “undo” when I had nothing to undo
3. Why did I get a trial error message?
4. Why did “ListBoxer” close?

Expected result:

1. Correct spelling
2. Not be able to click on options you can't do.
3. Not be phased out from the program when you are clicking on certain options.

Actual result:

It's wrong spelled and you are able to click on functions you shouldn't have access to and when you do it the program crashes.

Bugg 5

Defect ID:

123

Title/summary:

The saved “ListBoxer” file couldn’t be re-opened.

Reporter Name:

Josefin Schönqvist

Defect Reported Date:

08/09 2020

Who Detected:

QA

How detected:

Running a test.

Project name:

Technical task

URL:**Release/build version:**

Couldn’t open my saved file I’ve done in “ListBoxer”.

Defect/Enhancement:

Be able to open the files you saved from “ListBoxer” in ListBoxer again.

See reference pictures 12 and 13.

Environment:

Windows 10

Priority:

High

Severity:

Critical

Status:

New

Step to Reproduce:

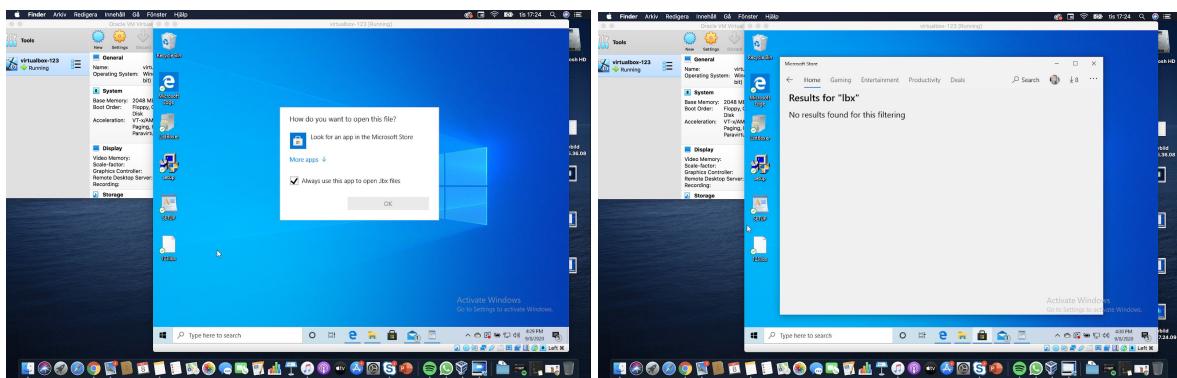

- i. I've saved a file where I had added both numbers and letters on the desktop.
- ii. When I tried to open it up again, Windows directed me to their store where I could download new software to open the file.
- iii. Inside the store, I got the message "Result for "lbx" No results found for this filtering".

Expected result:

That I would be able to save and open my files in "ListBoxer".

Actual result:

I wasn't able to open it.

Attachments:**Defect close date:**

1-3 days.

Bugg 6

Defect ID:

123

Title/summary:

Problem to end the session in “ListBoxer” and press the cancel button at the last minute.

Reporter Name:

Josefin Schönqvist

Defect Reported Date:

08/09 2020

Who Detected:

QA

How detected:

Running a test.

Project name:

Technical task

URL:**Release/build version:**

I decided to exit the program and changed my mind at the last minute and pressed the exit button instead - program crashed.

Defect/Enhancement:

I'd pressed the exit button and pressed cancel instead of "yes" or "no". When the program asked me to save my program before ending the session.

See reference picture 12.

Environment:

Windows 10

Priority:

Medium

Severity:

Major

Status:

New

Step to Reproduce:

- i. Make a program with numbers and letters
- ii. Go to the exit button under file.
- iii. Instead of pressing “yes” or “no” - press “cancel”

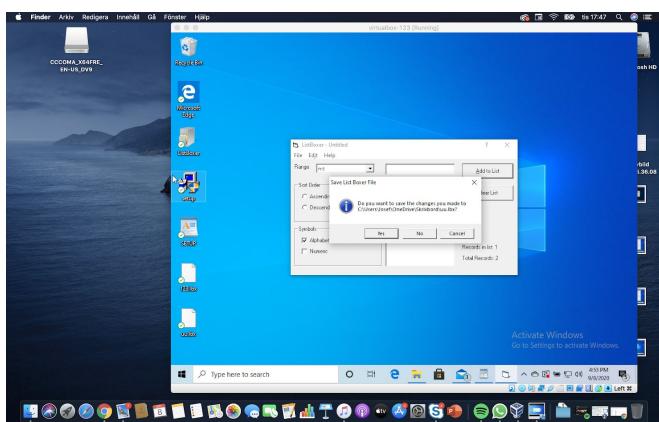

Expected result:

To come back to the program to continue doing inputs.

Actual result:

The Program crashed.

Bugg 7

Defect ID:

123

Title/summary:

“Clear list” aren’t reliable to input/output

Reporter Name:

Josefin Schönqvist

Defect Reported Date:

10/09 2020

Who Detected:

QA

How detected:

Running a test.

Project name:

Technical task - Investigating the list sorting.

Release/build version:

While doing a test for the sorting list.

Defect/Enhancement:

The “Clear list” button isn’t behaving symmetrically towards the actions you are taking. If you have anything that needs to be cleaned from the system, you should be able to use the “clear list” button.

Environment:

Windows 10

Priority:

Low

Severity:

Minor

Status:

New

Step to Reproduce:

Range	Sort order	Symbols	Input	Output	Add to list	Clear list	Records in list	Total records
<none>	Ascending	Alphabetic	abc	-	yes	no	0	1
All	Ascending	Alphabetic/ Numeric	111	abc,111	yes	yes	2	2

See attached pictures - 14, 15 and 16.

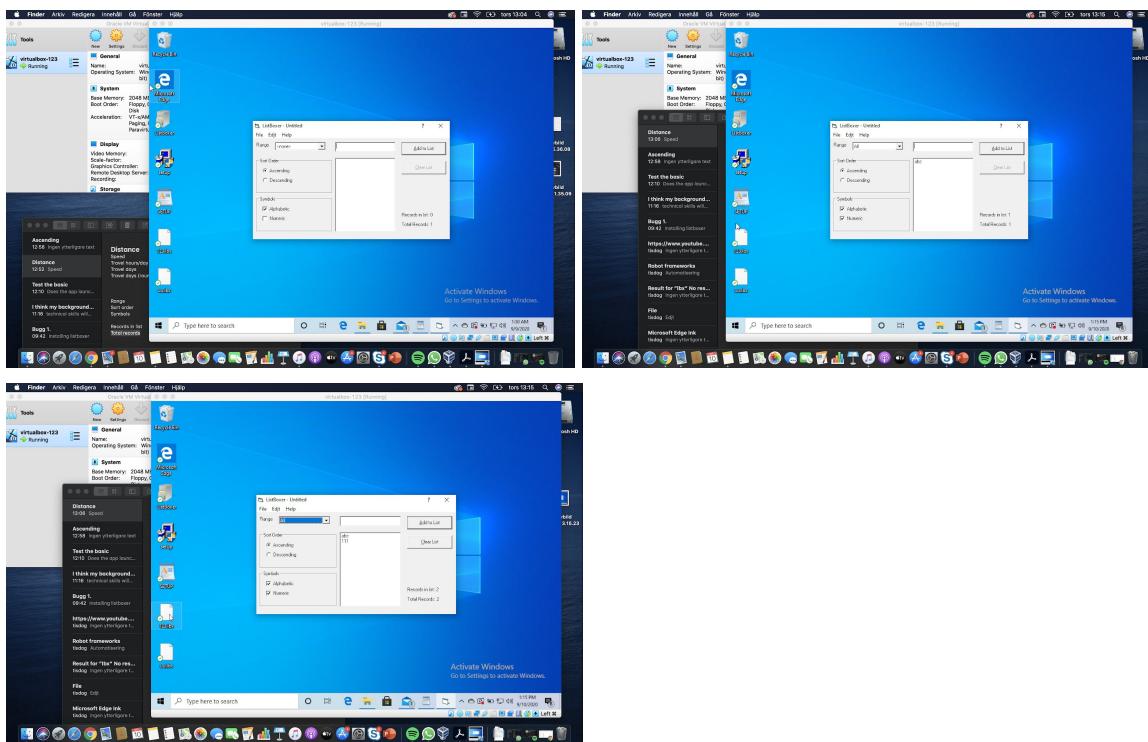

Expected result:

Be able to use the “clear list” as fast as you have pressed any input and have at least 1 in the “total records” box.

Actual result:

1. My first input was ABC with a range of <none>, Symbols “alphabetic”, sort order “ascending”, the result was zero input after adding to list, Records in list: 0, and Total Records: 1. “Clear list” wasn’t an available option.
2. I added “Numeric” as an option, Range changed to “all”, no input, output “abc”, records in list: 1, total records: 1, and “clear list” was still not an option to click on.
3. Range “all”, sort order “ascending”, symbols “alphabetic” and “numeric”, input “111” output “abc” and “111”, records in list: 2, total records: 2 and “clear list” is now an available option.

Bugg 8

Defect ID:

123

Title/summary:

“Range sorting” isn't following any red line.

Reporter Name:

Josefin Schönqvist

Defect Reported Date:

10/09 2020

Who Detected:

QA

How detected:

Running a test.

Project name:

Technical task - Investigating the list sorting.

Release/build version:

While doing a test for the sorting list.

Defect/Enhancement:

The “range sorting” list gives different values depending on which value you have put on symbols.

Environment:

Windows 10

Priority:

Low

Severity:

Trivial

Status:

New

Step to Reproduce:

1. Open “ListBoxer”
2. Unmark the Alphabetic box

3. Add Numeric

Range	Sort order	Symbols	Input	Output	Add to list	Clear list	Records in list	Total records
<none>		Alphabetic						
All		Numeric						

See attached pictures - 17, 18 and 19.

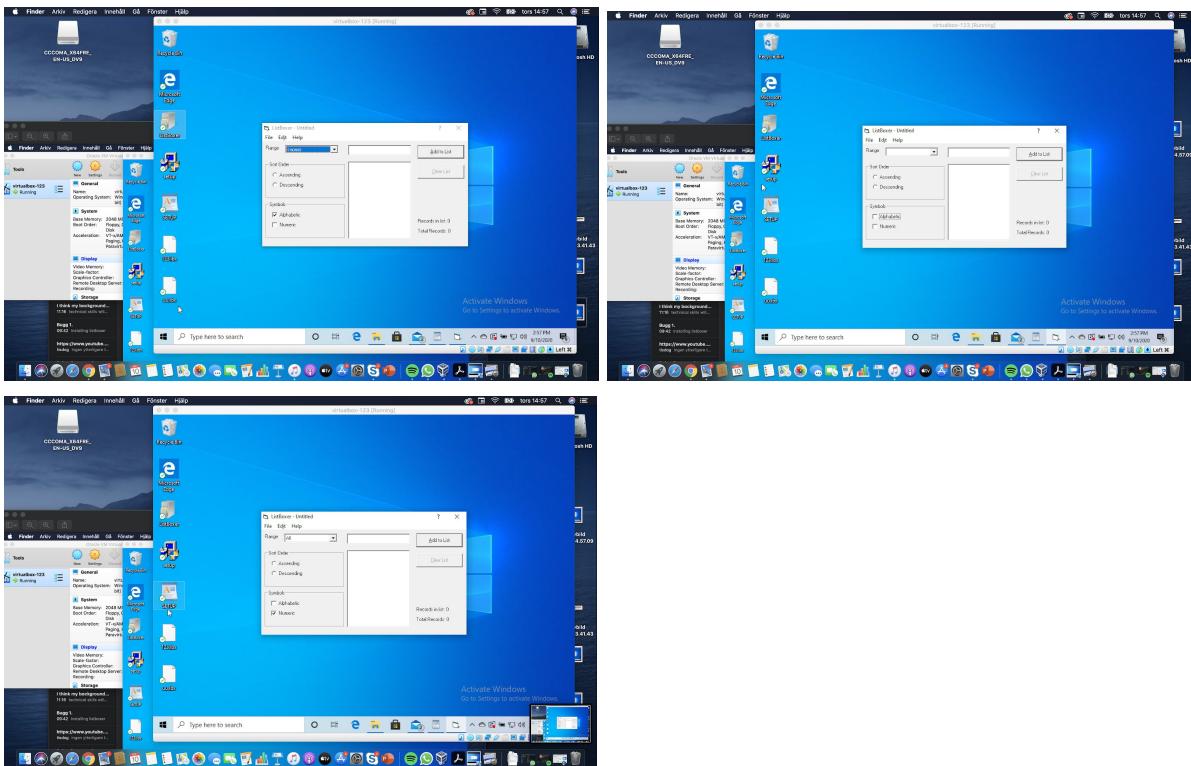

Expected result:

To have the same “range” default depending on Numeric and Alphabet.

Actual result:

On numeric: “all” and one Alphabetic “<none>”

Defect close date:

When you have some time left.

Bugg 9

Defect ID:

123

Title/summary:

Trying to open the saved file 123.ibx and to connect to the right program.

Reporter Name:

Josefin Schönqvist

Defect Reported Date:

10/09 2020

Who Detected:

QA

How detected:

Running a test.

Project name:

Technical task - saved files.

Release/build version:

Doing a test for saved files.

Defect/Enhancement:

You can't direct Listboxer to your saved file and you can't find the program on your computer while searching for a program to open the file with.

Environment:

Windows 10

Priority:

High

Severity:

Blocker

Status:

New

Step to Reproduce:

- Clicking on 123.ibx.
- The program can not open - download or choose a program.

- The only program available is "setup", ListBoxer doesn't exist.
- Choosing "setup"
- Error

See attached pictures - 20, 21, and 22.

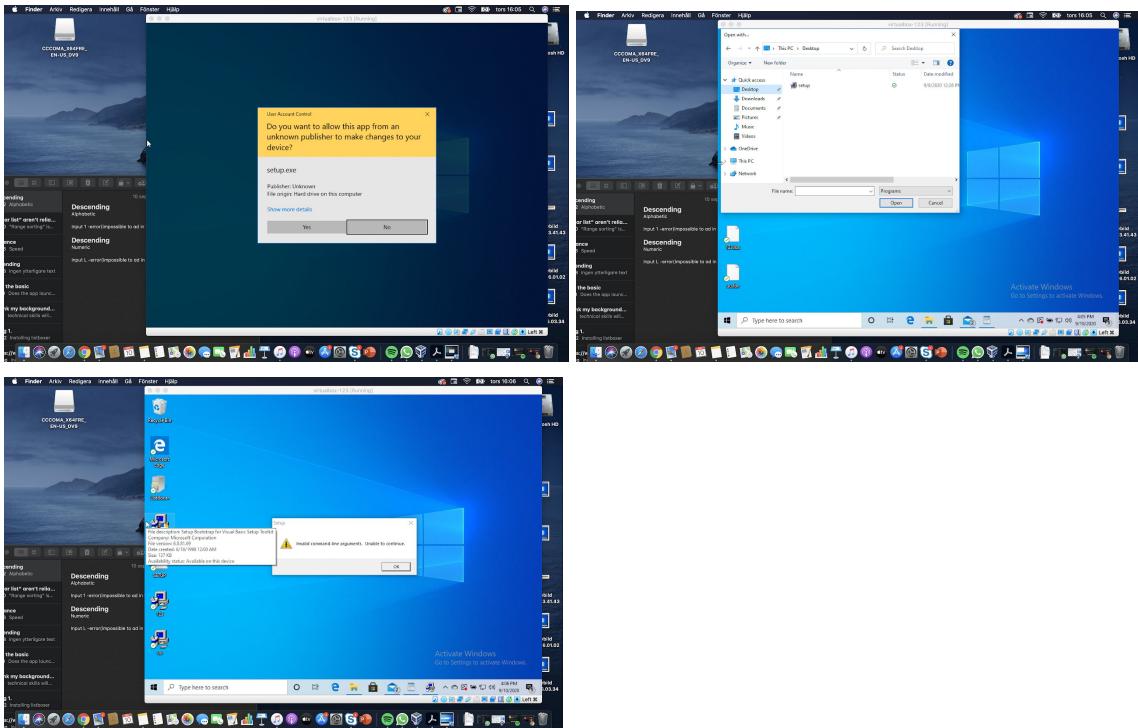

Expected result:

To open the file, if that doesn't work to locate Listboxer to 123.ibx

Actual result:

Couldn't find Listboxer on the computer and made an error while connecting it to the setup program (but that could be expected).

ASAP

Bugg 10

Defect ID:

123

Title/summary:

Doing a test from a saved file I open up in Listboxer, through ListBoxer.

Reporter Name:

Josefin Schönqvist

Defect Reported Date:

10/09 2020

Who Detected:

QA

How detected:

Running a test.

Project name:

Technical task - saved files.

Release/build version:

Open up saved a file inside Lisboxer and started to mark and unmark the symbol box.

Defect/Enhancement:

The symbols aren't aligned with the actual output. You aren't able to have a "true" or "false" statement when your output is both text and numbers together.

Environment:

Windows 10

Priority:

Major

Severity:

Medium

Status:

New

Step to Reproduce:

- Open file 123.ibx from Listboxer - correct
- Unmark Numeric - output: byeee, eee5655

- Unmark Alphabetic - Output: -
- Mark Numeric Output: -

See reference pics: 23, 24, 25, 26

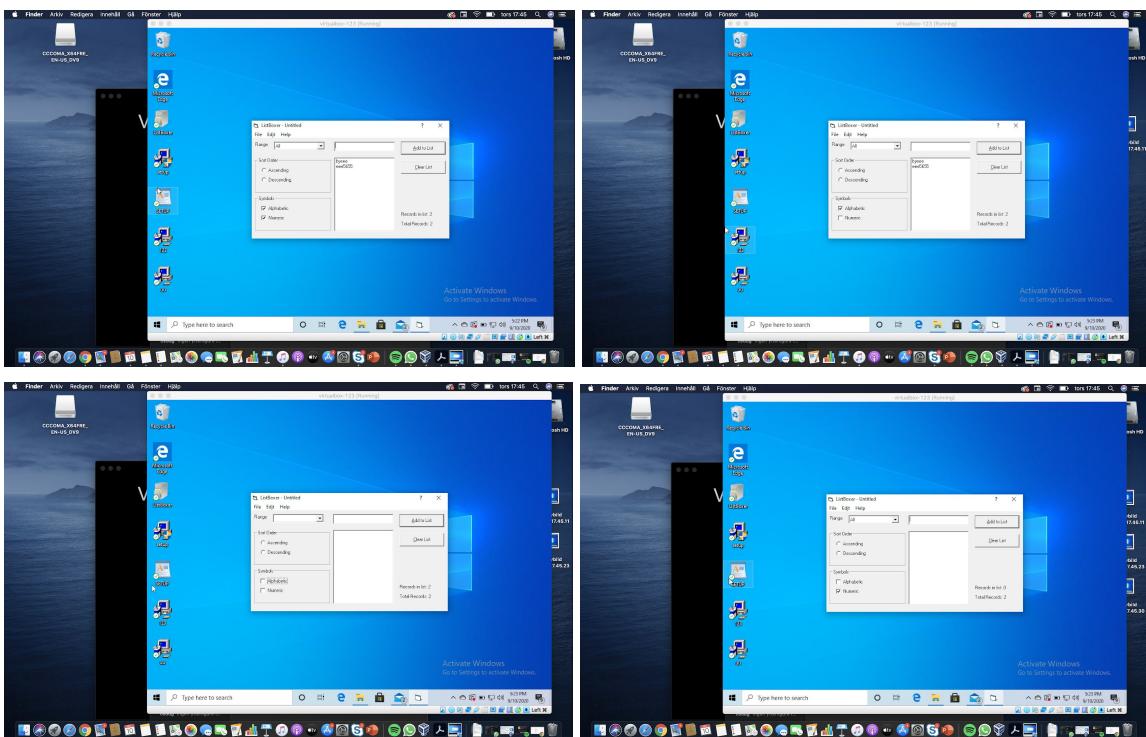

Expected result:

Don't be able to see the output "eee5655" when not both Numeric and Alphabet were marked.

Actual result:

To not see the output "eee5655" while Numeric was marked, but still see it when only Alphabet was marked.

Defect close date:

1-2 week.

Bugg 11

Defect ID:

123

Title/summary:

Sorting by - "Ascending" and "descending" do not work until you put a new input.

Reporter Name:

Josefin Schönqvist

Defect Reported Date:

10/09 2020

Who Detected:

QA

How detected:

Running a test.

Project name:

Technical task - Investigating the list sorting.

Release/build version:

I was switching from "Ascending" to "descending" without performance.

Defect/Enhancement:

With two outputs should you be able to switch ascending and decreasing without putting in new values. If the values had been equal you should be able to log them as equal, maybe next to each other.

Environment:

Windows 10

Priority:

medium

Severity:

Critical

Status:

New

Step to Reproduce:

- Mark both Numeric and Alphabetic

- Input: "eee5655" and "byeee"
- Switch from "Ascending" to "descending".
- If you want: Add "111" and try again to see how it should go.

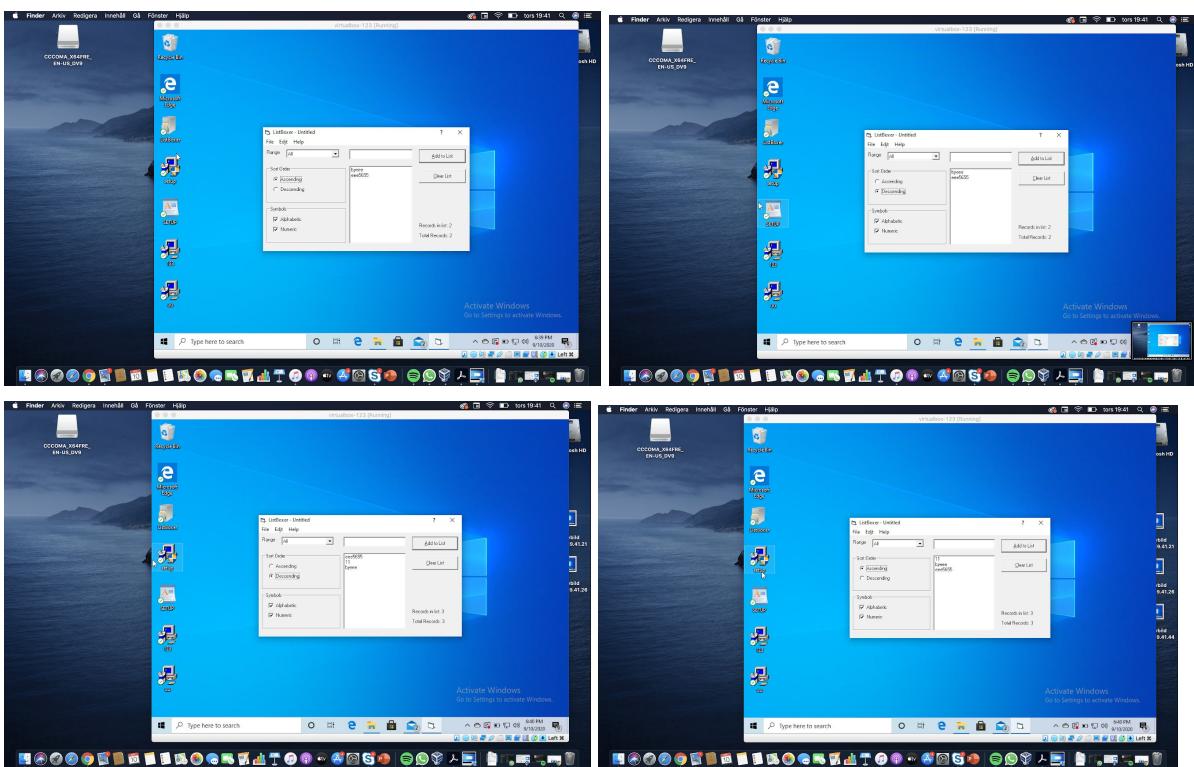

Expected result:

To be able to switch hierarchy when changing "Ascending" to "descending" and the other way around.

Actual result:

Not be able to switch "Ascending" to "descending" until I'd made a new input.

Attachments:

Defect close date:

1 Week.

Bugg 12

Defect ID:

123

Title/summary:

Sometimes able to input whitespace and other times not.

Reporter Name:

Josefin Schönqvist

Defect Reported Date:

10/09 2020

Who Detected:

QA

How detected:

Running a test.

Project name:

Technical task - Investigating the list sorting.

Release/build version:

I fed in whitespace in the input and got it as an output.

Defect/Enhancement:

Since whitespace is not a single value itself it shouldn't be possible to make it as an input.

Environment:

Windows 10

Priority:

low

Severity:

Trivial

Status:

New

Step to Reproduce:

- Pic 31 Range "all", Sort order "descending", Symbols "Alphabetic" and "Numeric"
Input "byeee", "11", "eee5655" and " "

- Pic 32 Range "all", Sort order "descending", Symbols "Alphabetic" and "Numeric" Input "byeee", "11", "eee5655", " " and "
- Pic 33 Range "all", Sort order "descending", Symbols "Alphabetic" and "Numeric" Input "byeee", "11", "eee5655", " ", " ", "44" and "
- Pic 34 Change: Unmarked Alphabetic.
- Pic 35 Change: marked Alphabetic.
- Pic 36 Change Sort order: change from "descending" to "ascending"
- Pic 37 Input: " " and no output.

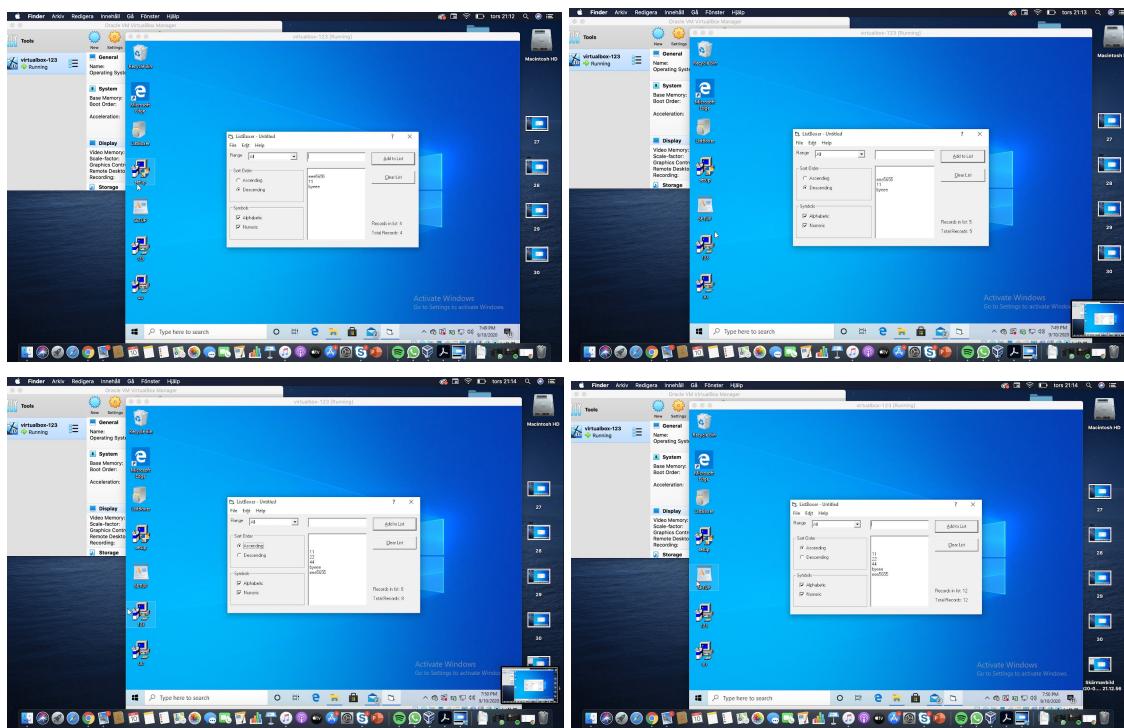

Expected result:

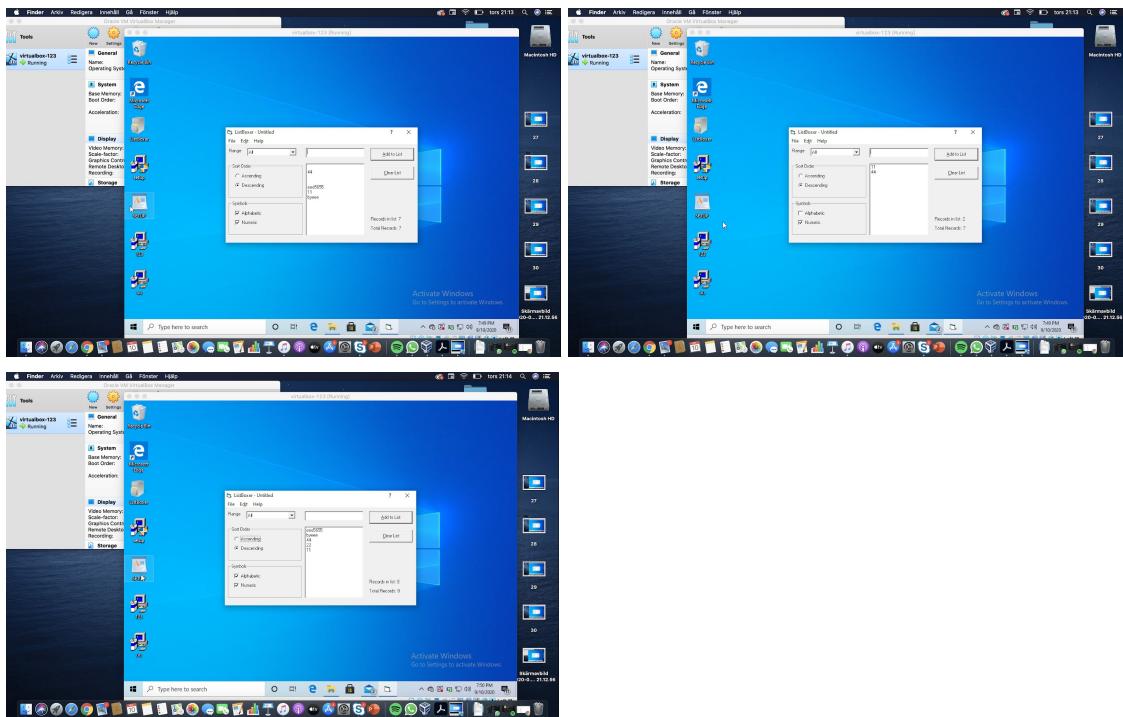

To not be able to put in Whitespace as a value

Actual result:

Sometimes you could put whitespace as a value and other times not. Depending on your settings did whitespace perform in the hierarchy and not at all. After some switches weren't it possible anymore to put whitespace as an input anymore.

123

Title/summary:

“Clear list” and after I was able to press “undo” and the old input I had cleaned came back.

Reporter Name:

Josefin Schönqvist

Defect Reported Date:

10/09 2020

Who Detected:

QA

How detected:

Running a test.

Project name:

Technical task - Investigating “clear list”

Release/build version:

Technical task - Investigating the “clear list” function.

Defect/Enhancement:

After I had pressed “clear list” I’d pressed on “undo” several times where older combinations appeared with no matching “records in list” and “total records”.

Environment:

Windows 10

5

Priority:

Medium

Severity:

Major

Status:

New

Step to Reproduce:

- Pic 38 "Clean list"
- Pic 39 "undo"

- Pic 40 "undo"
- Pic 41 Unmark "Numeric"

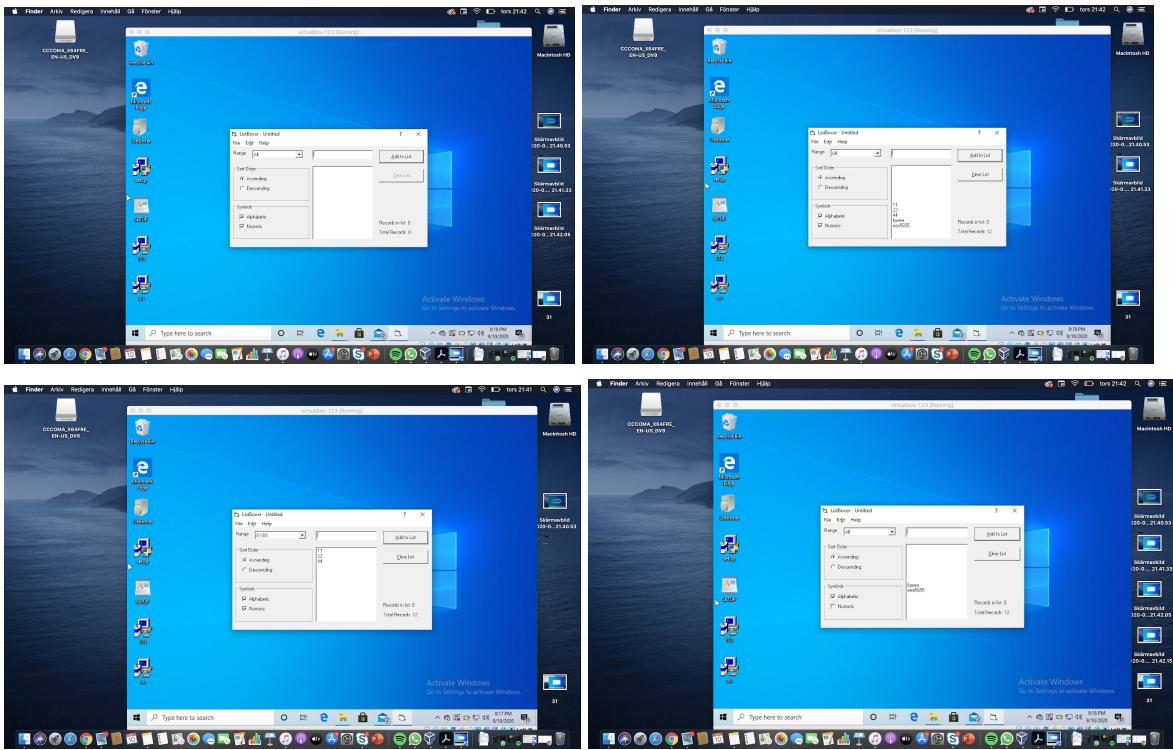

Expected result:

To not be able to press undo after pressing “clear list”

Actual result:

Be able to press undo, with a no matching output towards “records in list” and “total records”. As well as losing “Alphabetic” while continuing pressing “undo”.

Attachments:

Defect close date:

1-2 weeks.

Bugg 14

Defect ID:

123

Title/summary:**Reporter Name:**

Josefin Schönqvist

Defect Reported Date:

10/09 2020

Who Detected:

QA

How detected:

Running a test.

Project name:

Technical task - Investigating the list sorting.

Release/build version:

I was giving ListBoxer a input straight after starting the program without defining a value of “Ascending” or “Descending”.

Defect/Enhancement:

Input doesn't work “Numeric” without setting a value of “Ascending” or “Descending”. Neither if you have only set “Alphabetic” as the only value, but if you mark both it works to do inputs. I believe that a great feature could be to have a preset value while starting the program.

Environment:

Windows 10

Priority:

Low

Severity:

Minor

Status:

New

Step to Reproduce:

- Range: "<none>", Sort order "unmark", symbols "Alphabetic", Input "a" output "error"
- Range: "all", Sort order "unmark", symbols "Alphabetic" and ""Numeric, Input "22222222" output: message "The number you entered was not a valid number. Enter number less 9999."
- Range: "all", Sort order "unmark", symbols "Alphabetic" and ""Numeric, Input "9999", Records in list "1", Total Records "1"
- Range: "all", Sort order "unmark", symbols "Alphabetic" and ""Numeric, Input "9999", Records in list "1", Total Records "1"
- Range: "all", Sort order "unmark", symbols "Alphabetic" and ""Numeric, Input "333", Records in list "2", Total Records "2"
- Range: "all", Sort order "unmark", symbols "Alphabetic" and ""Numeric, Input "1", Records in list "3", Total Records "3"
- Range: "all", Sort order "unmark", symbols "Alphabetic" and ""Numeric, Input "m", Records in list "4", Total Records "4"

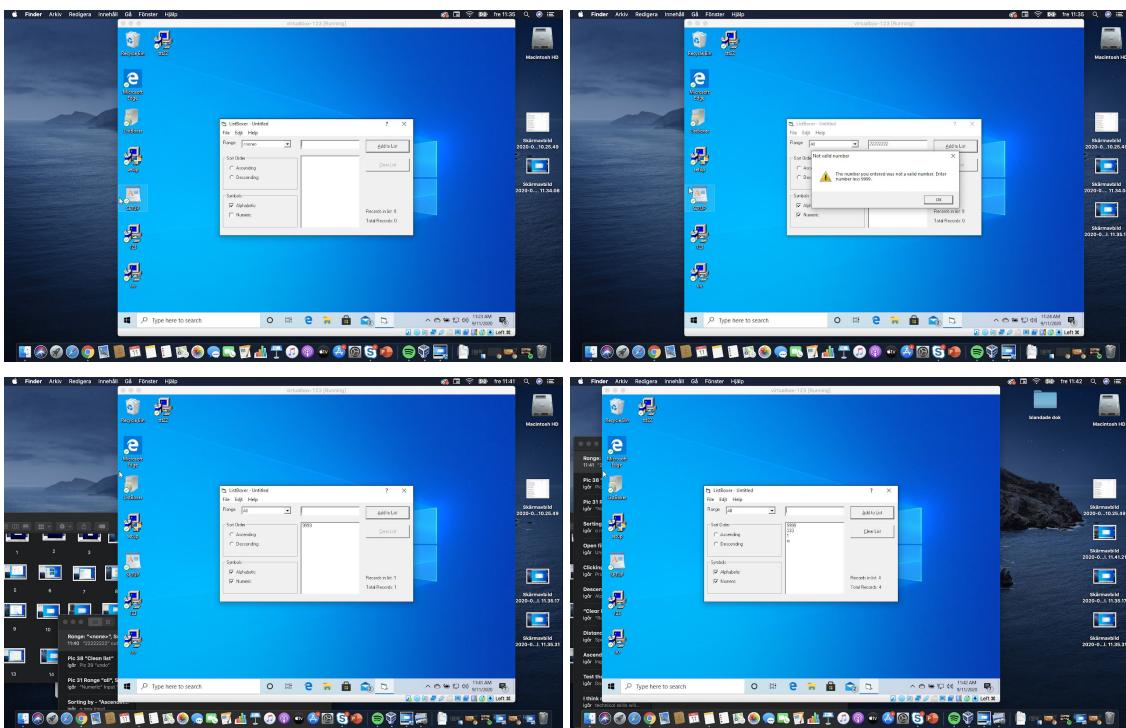

Expected result:

To not be able to give input at all, before defining "Ascending" or "Descending". Regardless of the settings of symbols.

Actual result:

I could give input when both of the symbols were marked.

1-2 weeks.

Bugg 16

Defect ID:

123

Title/summary:

Not a consistent way to end the session.

Reporter Name:

Josefin Schönqvist

Defect Reported Date:

10/09 2020

Who Detected:

QA

How detected:

Running a test.

Project name:

Technical task

Release/build version:

Trying to exit the program from the upper right corner.

Defect/Enhancement:

Sometimes the system crashes, other times it doesn't ask if I want to save. I believe it's great to be consistent in all gateways and always ask if I want to leave.

Environment:

Windows 10

Priority:

Medium

Severity:

Major

Status:

New

Step to Reproduce:

- File --> Exit --> message "do you want to save the changes you made to untitled"--> cancel --> system crashes.

- Press the "cross button" in the right upper corner --> system crashes with asking if I want to save.

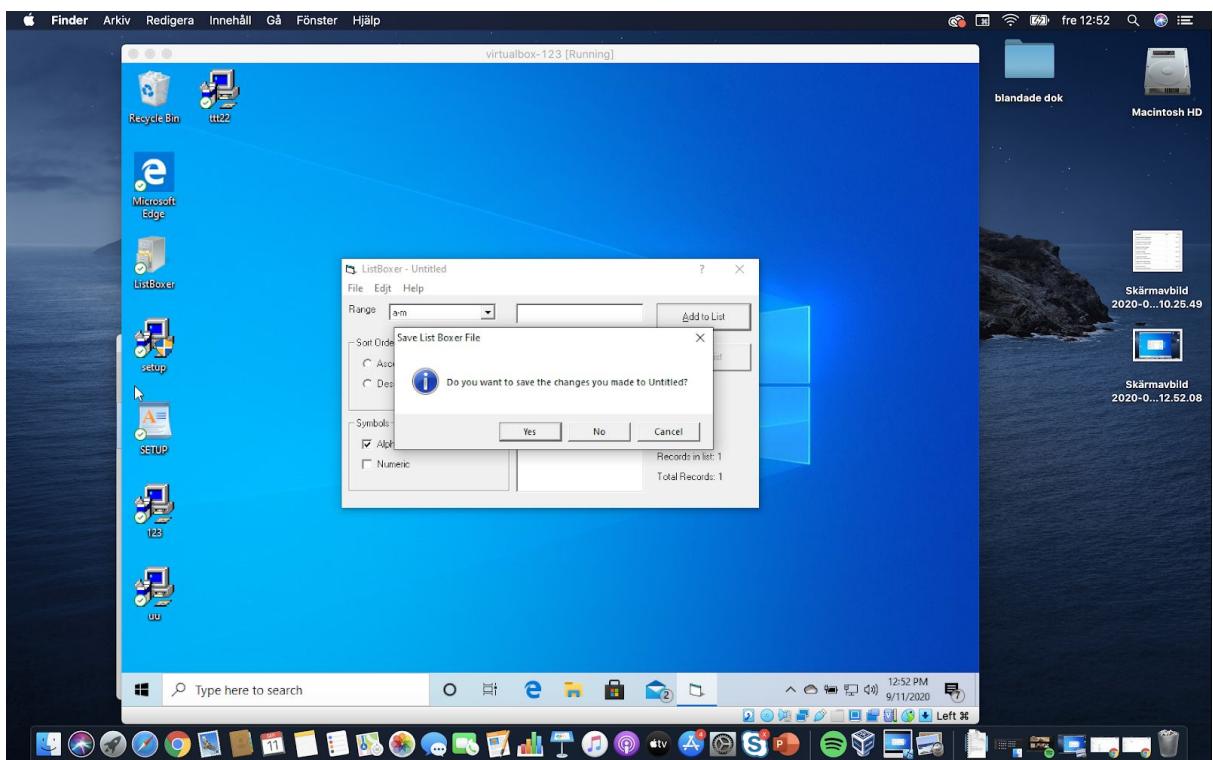

Expected result:

To get the question if I want to save the file.

Actual result:

Depending on where I decided to end the trial, different results happens.
